

What can you do?

Babies will not be saved without your help!
You are needed to:

- 1. Contact your senate and house representatives**—Tell them TODAY why it is important that Kansas take the first step in ending abortion once and for all.
- 2. Share your resolve**—The more people that know of your determination to end unborn child-killing, the greater chance we have to end this holocaust in Kansas. Speak to your friends, relatives, pastor, and church about the Personhood Amendment.
- 3. Collect signatures**—Although Kansas is not a petition state (meaning a certain number of signatures are required to get an amendment on the ballot), we have already collected thousands of signatures of Kansas residents who want to have the opportunity to express their faith and resolve to see abortion ended in Kansas.

For petitions and how to contact your Kansas representatives go to:

Every child
has rights!

What will bring an end to abortion in Kansas?

Establishing the Right to Life

The Personhood Amendment is the only plan to end abortion in Kansas. It simply states that: *"Kansas shall hereby guarantee the inalienable rights, equal protection and due process of law of every human being from the beginning of the biological development of that human being, including fertilization."*

Our goal is to end abortion in Kansas. We want to give Kansans like you an opportunity to vote on this life-saving amendment.

Amending our constitution requires a simple majority at a state wide election. In order for an amendment to appear on the ballot two thirds of both the Kansas House and Senate must approve the amendment appearing on the ballot.

Your district legislators need to know of your desire to vote for this life saving personhood amendment. Nothing we can do as Christians is more important than ending the killing of the children!

1

Exposing the Hypocrisy of Kansas Law

Would you be surprised to hear that Kansas law already recognizes the humanity of the unborn child and that her rights are protected from the time of conception? But only if she is wanted.

The reality is that our Kansas Attorney General is prosecuting criminals who kill or attempt to kill wanted unborn children. Consequently, as a person, the unborn is entitled to certain inalienable natural rights including the right to life as provided by Section 1 of the Kansas Bill of Rights.

Biologically, there is no difference between a wanted and unwanted unborn child. There should be no difference in recognition and protection. While we work to pass a clearly defined Personhood Amendment, we are also working to point out the hypocrisy of Kansas law: convenience should never be the determining factor of which child lives and which child dies.

2

Standing Together

For decades, well-intentioned, God-fearing Kansans have worked vigorously to limit, restrict and regulate abortion, but after 40 years, we still have no end in sight.

We firmly believe that if all the pro-life organizations and churches in Kansas stood together on the Personhood Amendment that we could end abortion NOW. We have thousands of signatures of Kansans who want the opportunity to end abortion once and for all, but we need everyone! Ask your church and favorite pro-life organization in Kansas to stand together with us.

"We've been stuck in the desert for nearly 40 years. I'm tired of those who are afraid of the 'giants in the land.' Chipping away at abortion has not brought us any closer to ending abortion in our nation."

Rebecca Kiessling

Prolife Speaker / Conceived in Rape
